

Lapbank 4 Door Laptop Trolleys

High Quality, High Security Laptop Storage for 16, 20, 24 & 30 laptops

16 Compartment Laptop Trolley

Anti-Jemmy Security Device

7 lever mortise safe lock locates through the shelf and back into the 2mm steel cowl.

Charging compartment with lockable door.

Provides a high quality security solution ideal for secure storage, charging and networking of laptops in a highly engineered and well designed package.

Application:

The Lapbank range is perfect for education and training establishments where group laptops are returned for secure overnight storage and charging with networking options.

Key Features:

Highly Engineered and proven design developed over 10 years.

High Security - 2nr 7 lever mortise safe locks per door with anti-jemmy bar design, all welded construction and full length piano hinges. Double skin laptop doors provide security and rigidity.

Maneuverable - large diameter swiveling and individually locking heavy duty wheels are the highest quality available. High density plastic trolley handles provide a steady grip.

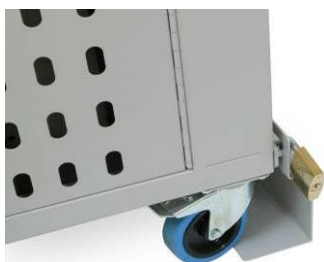

Ultra Safe and Simple Charging - RCD protected, double insulated, fully earth bonded with soft start, surge protection mains conditioner and anti-backwash device for total protection.

Uses the original laptop chargers so no expensive call out charges or on-going maintenance costs when swapping laptops.

Efficient Storage - load laptops from both sides reducing height and maintaining a low centre of gravity.
