

The Loxit LR1 Adjustable Security Clamp Fits all Sizes of Laptop

The clamp is simply **screwed to the desk**, counter or shelf through the four countersunk holes in the base.

A substantial **pivoting base** provides rotation for the clamp when used on display.

Width adjustment is combined with the locking mechanism situated at the rear.

The design incorporates an **adjustable front clip** to prevent the laptop base from being raised thus **blocking access to batteries** and drive releases.

The LR1 expands to accommodate PDAs to 17" laptops.
