

Universal Projector Wall Booms

For medium & long throw projectors 1450- 3000mm long

Extendable boom shown with optional n-circle security clamp and heavy duty cable kit.

Extendable wall boom for medium & long throw projectors

The strong 80mm x 40 mm steel boom has 3mm steel backing plate with 6nr 14mm diameter holes for substantial fixings, providing a very stable base for the projector.

The boom kit includes a 3mm steel cable safety stop which may be attached to the structure directly above the boom or to the wall to ensure stability.

The extension boom simply adjusts in length to achieve the optimum focal position. The extendable length also provides a large tolerance for fitting upgrade projectors in the future.

The universal adapter plate is suitable for most modern projectors, covering fixing points up to 310mm square grid.

The kit comes complete with 4 swing arms, horizon adjustment bracket, dip angle bracket and fittings.

Long boom 1800mm - 3000mm
Standard boom 1450mm - 2350mm
