

# Swing Away Projector Wall Booms

Extendable swing away wall boom and protective wall box

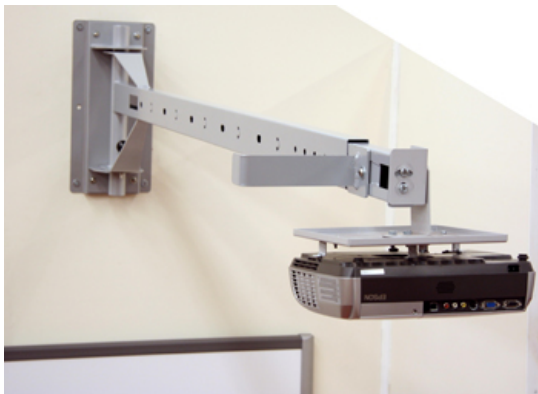

## Swing away extension boom

The swing arm enables the projector to be conveniently swung against the wall to remove any obstruction within the room.

A stopper located at the end of the boom prevents damage to the projector if it is swung away too quickly.

The robust 80mm x 40 mm steel box section is fully welded to a 3mm steel backing plate, which has 6nr 14mm diameter fixing holes for substantial fixings.

Kit includes a 3mm steel cable safety stop which may be attached to the structure directly above the boom or to the wall.

## Universal projector adapter plate

Suitable for most modern projectors and comes complete with 4 universal fitting swing arms, horizon adjustment bracket, dip angle bracket and fittings.

## Swing away boom protective case

Protects the projector in a wall mounted box.

Top hinged door allows the boom to enter from the left or right hand side.

Kit includes security case and padlock, does not include fixings.
