white powder coated

Maximum load:
20kg

Key Features

Designed specifically for Hitachi ultra short throw projectors.

Telescopic action is high quality, engineered for precision adjustment, includes massive adjustment length.

Simple installation:

Mount is fitted to wall with just 4 easy access fixings.

Projector and plate is fitted to mount.

Image adjustment:

Clever design enables projected image to be simply adjusted vertically and raised either side, in addition to in-built projector image adjustment.

Mount provides **stable platform** for projector, eliminating requirement for future adjustment.

Exceptional value for money.

Security compatible with security cable kits or customised protective case.

Protective Case shown with Hitachi ED-A100 Projector Mount and Security Cable Kit.

Hitachi ED-A Protective Case

The stylish security case **provides physical protection** from objects such as balls as well as proving a high level of security when coupled with the heavy duty security cable option.

Incorporating **custom vent holes and filter access**, the protective case is designed with maintenance in mind.

Simple to install, the projector security case provides a secure fixing attachment for the heavy duty cable kit which is then terminated into a substantial substrate with fixings suitable for brickwork, blockwork, concrete and timber.

The heavy duty projector cable kit comprises **11mm multistrand cable, 2 security bosses, heavy duty stainless steel wall bracket including heavy duty fixings and 51mm shackless brass padlock.**
